

# West Ridge *Equine*

**West Ridge Equine**

**West Ridge Veterinary Practice**

**Lapford, Devon**

**Equine vet vacancy**

**Would you like to work in the beautiful West Country, with a good work life balance and above average pay package? Well look no further!**

We are looking for an extra vet to join our expanding independent ambulatory Equine practice in Mid Devon.

The work comprises of a mix of competition horses, race horses and riding ponies, with stud work available for interested applicants.

We are lucky enough to have a full range of state of the art mobile diagnostic equipment, with trained office staff to help enable us to carry out all of our work on-yard. We would be expecting the right candidate to be keen and interested in working up their own cases, with help available from senior vets when required.

Our clients are lovely and very loyal, so good down-to-earth communication skills are key here.

Our team strives towards being friendly and approachable, with a strong team-work ethic, so we would be looking for someone like-minded. In return there will always be someone available to swap a night or weekend on call!

We offer a 1 in 4 out-of-hours rota, with a flexible day off in lieu after a weekend worked. There are 4 weeks holiday, and days off in lieu of any bank holidays worked. 5 days of CPD is encouraged per annum and paid for up to a value of £1500. Once you have been here a while, we will encourage you to take further formal CPD towards certificates, diplomas etc.

We will also pay for your VDS, BEVA and BVA membership. A mobile phone is provided and a vehicle if required. A generous salary is available based on experience.

There are potential future ownership options available for the right candidate – a rarity in this increasingly corporate world.

Please send all applications to senior vet Gordon Sidlow, [grsidlowvet@gmail.com](mailto:grsidlowvet@gmail.com), or if you would like to call and discuss the position further please call 01363 83030 and ask to speak to Gordon or Hannah.
